UNITED STATES DEPARTMENT OF AGRICULTURE

AGRICULTURE RESEARCH SERVICE

PLANT QUARANTINE DIVISION

LIST OF INTERCEPTED PLANT PESTS, 1957

(List of Pests Recorded from July 1, 1956, through June 30, 1957 as Intercepted in, on, or with Plants and Plant Products Entering United States Territory.)

Compiled by
Judith Hunt
Plant Quarantine Aid

INTRODUCTION

This forty-fourth report of interceptions summarizes the records of insect pests, plant pathogens, and certain other organisms found in, on, or with plant products (1) imported, (2) offered for but refused entry, (3) held as ships' stores, etc., and hence not offered for entry through customs, (4) offered for entry for immediate transportation and exportation in bond, and (5) in domestic shipments between the American Virgin Islands, Hawaii, and Puerto Rico and the mainland.

This report is largely a compilation of insects and plant diseases of known or potential plant quarantine significance to the United States. Some common organisms are included if they are (1) new to the country of origin, or (2) new to the host plant, or (3) are of such limited distribution in the United States that they are worthy of mention.

The data for this list, which includes some for the previous year, are largely obtained from identifications made by specialists of the Entomology Research Division and Plant Quarantine Division, supplemented by information supplied by State officials. Some, however, represent critical studies and determinations made by specialists of the Crops Research Division who also identified many of the host plants cited.

All scientific names are reviewed by specialists in the Department to assure conformance to the International Rules of Nomenclature.

Every effort is made to give the correct origin for all collections listed, questionable cases are omitted or the origin is listed as unknown.

INTERCEPTIONS FROM AIRBORNE MATERIAL

The rapid growth of air transportation continues to increase the danger of foreign plant pests being introduced by this means. In addition to international air travel, commerce in plants and plant products by air is developing steadily. The speed with which pests may now be brought

from all parts of the world makes conditions more favorable for their survival and necessitates constant vigilance to apprehend them at ports of entry.

Pests were intercepted on plant material arriving by airborne baggage, express, freight, mail, and stores. During the year 3,024 interceptions were made of insects on imported plant parts or as stowaways, and 559 interceptions of plant diseases.

Some important insect interceptions in airborne material were:

Adoxophyes orana on lilac in cargo from the Netherlands.

The Citrus blackfly (*Aleurocanthus woglumi*) on citrus leaves in baggage from Mexico and Nicaragua.

Anastrepha fraterculus in peach in baggage from Peru.

The Mexican fruit fly (*Anastrepha ludens*) in grapefruit in baggage from Mexico; in mango in baggage from Guatemala; in orange in baggage from Mexico; and in white sapote in cargo from Mexico.

The West Indian fruit fly (*Anastrepha mombinpraeoptans*) in bitter-almond in baggage from the Dominican Republic; in guava in baggage from Guatemala; in mango in baggage from Antigua, British Honduras, Costa Rica, Cuba, Dominican Republic, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Puerto Rico, St. Kitts, and Salvador; in mango in quarters from an unknown origin; in yellow mombin in baggage from Central America (country (?)), the Dominican Republic, Guatemala, Nicaragua, and Salvador.

Anastrepha serpentina in mamey in baggage from Mexico; and in mamey sapote and sapodilla in baggage from Nicaragua.

Anastrepha striata in guava in baggage from Guatemala and Salvador.

Anastrepha suspensa in guava in baggage from Puerto Rico; and in guava in cargo from Jamaica.

A rose stem borer, *Ardis sulcata*, in rose stem in quarters from Germany.

The Mediterranean fruit fly (*Ceratitis capitata*) in apricot in stores from France; in avocado in preflight inspection of baggage leaving Hawaii for the mainland; in cherimoya in baggage from South America (country (?)); in coffee berry in preflight inspection of baggage leaving Hawaii for the mainland; in fig in baggage from Italy; in grapefruit in baggage from Bermuda; in loquat in baggage from Italy; in orange in baggage from Iraq; in orange in stores from the Azores, France, and an unknown origin; in peach in baggage from Argentina, Azores, and Italy; in pear in baggage from Italy and an unknown origin; in pear in stores from an unknown origin (Mediterranean region); in plum in baggage from Germany and Italy. *C. capitata* (?) in coffee berry in preflight inspection of baggage leaving Hawaii for the mainland; in guava in baggage from the Azores; in orange in baggage from the Madeira Islands; and in orange in stores from Israel (?).

Cylas formicarius var. in sweetpotato in cargo from the Philippines.

Palaeopus costicollis in yam in baggage from Jamaica.

The pink bollworm (*Pectinophora gossypiella*) in cottonseed in baggage from the Bahamas and Cuba; in cotton boll in preflight inspection of baggage leaving Hawaii for the mainland; in cotton lock in baggage from Cuba; and in okra in baggage from the Dominican Republic.

The gypsy moth (*Porthetria dispar*) in apricot in stores from France.

The European corn borer (*Pyrausta nubilalis*) in samples of broomcorn in mail from Yugoslavia.

Rhagoletis cerasi in cherries in baggage from France, Germany, and Greece; in cherries in quarters from Germany; and in cherries in stores from France, Italy, Portugal, and Spain.

Rhagoletis cingulata in cherries in stores from France.

Interceptions of airborne plant pathogens of interest were:

Alternaria dauci on coriander leaf in cargo from Puerto Rico.

Cercospora panacis (?) on *Nothopanax* sp. in quarters from Australia.

Chrysomya ledi var. *rhododendri* on rhododendron leaves in baggage from Austria and Switzerland; on rhododendron leaves in mail from Germany and Switzerland; and on rhododendron leaves in quarters from Germany.

Corynespora cassiicola on palm fronds in cargo from Mexico.

Hypocrella sloaneae on leaf of *Chamaedorea oblongata* in cargo from Mexico.

Leptosphaeria culmifraga on rice straw in baggage from Japan.

Meliola acervata on *Physalis peruviana* in preflight inspection of baggage leaving Hawaii for the mainland.

Mycosphaerella cattleyae on a leaf of *Epidendrum* sp. in cargo from Ecuador; and on an orchid leaf in cargo from New Guinea.

Phoma citricarpa on *Citrus* sp. peel in baggage from Japan; on grapefruit in baggage from Pakistan; on lemon in stores from Australia; on Mandarin orange in baggage from China, Hong Kong, Japan, and the Philippines; on orange in baggage from Hong Kong, Japan, and the Union of South Africa; on orange in quarters from Mozambique and the Union of South Africa; and on orange in stores from Australia, Brazil, Mozambique, and the Union of South Africa.

Phyllosticta coccolobae on seagrape in baggage from Kwajalein.

Phyllosticta fusco-zonata (?) on leaves of *Rubus* sp. in stores from Italy.

Pseudopeziza ribis on leaves of European black currant in baggage from Germany.

Septoria petroselini on parsley in stores from the Azores.

Sphaceloma fauvelletii var. *scabiosa* on *Citrus hystrix*, lemon, and lime in stores from Australia.

Uredo scabies on leaf and stem of *Vanilla* sp. in baggage from Panama.

Citrus canker (*Xanthomonas citri*) on orange in quarters and stores from Japan; and on satsuma orange in baggage from Hong Kong.

Xanthomonas malvacearum on cotton leaf in baggage from the Bahamas.

Xanthomonas sp. (Cancrosis B) on lemon in stores from Argentina.

The following nematodes were found in airborne material:

Helicotylenchus erythrinae in soil with amaryllis bulbs in baggage from Portugal; in soil with dahlia roots in baggage from Scotland; in soil with gladiolus corms and lily bulbs in baggage from Italy; and in soil with plants in baggage from Canada.

Helicotylenchus multicinctus in soil around roots of bloodleaf in baggage from Costa Rica.

Helicotylenchus nannus in soil with begonia and Crassulaceae plants in baggage from the Azores; in soil with cuttings of begonias and fuchsias in baggage from Greece; in soil with heather in baggage from Scotland; in soil with rhododendron plants in baggage from Scotland; in soil with mint plants in baggage from Cuba; in soil with sansevieria plants in baggage from Haiti; and with soil around roots of an unknown plant in baggage from Jamaica.

The oat nematode (*Heterodera major*) in soil with geranium plants in baggage from England.

The golden nematode (*Heterodera rostochiensis*) in soil with amaryllis, euonymus, geranium, and oxalis plants in baggage from Ireland; in soil on a pair of boots in baggage from Ireland; in soil with heather in baggage from Scotland; in soil with lily-of-the-valley plants, hyacinth, lily, and tulip bulbs in baggage from England; and in soil with shamrock plants in mail from England.

Rotylenchus erythrinae (?) in soil with aloe plants in baggage from Jamaica.

Rotylenchus reniformis in soil with unidentified bulbs in baggage from Cuba.

Rotylenchus robustus in soil with carnation and primrose plants and tuberose bulbs in baggage from England.

Tylenchorhynchus brevidens with primrose plants in baggage from Ireland.

Tylenchorhynchus dubius in soil with plants in baggage from Canada.

Tylenchus filiformis in soil with cactus plant in baggage from Greece; and in soil with *Sedum* sp. in baggage from Italy.

NOTES ON INSECTS INTERCEPTED

FRUIT FLIES

The following fruit flies were intercepted:

Acidia heraclei (?) in celery in stores from France.

Anastrepha fraterculus in peach in air baggage from Peru.

The Mexican fruit fly (*Anastrepha ludens*) in apple in baggage from Mexico; in grapefruit in stores from British Honduras and Mexico; in grapefruit in baggage from Mexico; in Mandarin orange in baggage from Mexico; in mango in air baggage from Guatemala; in mango in baggage and stores from Mexico; in orange in stores from Guatemala; in orange in air baggage, baggage, quarters, and stores from Mexico; in peach, pear, ponderosa lemon, quince, and sweet lime in baggage from Mexico; and in white sapote in baggage and air cargo from Mexico. *A. ludens* (?) in mamey sapote and mango in baggage from Mexico.

The West Indian fruit fly (*Anastrepha mombinpraeoptans*) in bitter-almond in air baggage from the Dominican Republic; in guava in air baggage from Guatemala; in guava in baggage from Cuba and Mexico; in guava and guava berry in cargo from

Tortola; in mango in air baggage from Antigua, British Honduras, Costa Rica, Cuba, Dominican Republic, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Puerto Rico, St. Kitts, and Salvador; in mango in baggage from Mexico, Puerto Rico, Salvador, and Tortola; in mango in cargo from Cuba and Tortola; in mango in mail from Cuba and Panama; in mango in air quarters from an unknown origin; in mango in quarters from Cuba, Puerto Rico, and Trinidad; in mango in stores from Panama; in mombin (*Spondias* sp.) in air baggage from British Honduras, Guatemala, and Salvador; in purple mombin in air baggage from Guatemala, Mexico, and Nicaragua; in yellow mombin in air baggage from Central America (country (?)), Dominican Republic, Guatemala, Nicaragua, and Salvador; and in yellow mombin in baggage from St. Martin; *A. mombinpraeoptans* (?) in mango in baggage from Ecuador; and in mango in stores from Venezuela.

Anastrepha serpentina in mamey in air baggage from Mexico; in mamey sapote in air baggage from Nicaragua; in mamey sapote in baggage from Mexico; in mamey sapote in stores from Colombia; and in sapodilla in air baggage from Nicaragua.

Anastrepha striata in guava in air baggage from Guatemala and Salvador; in guava in baggage from Mexico; and in guava in mail from Puerto Rico.

Anastrepha suspensa in guava in air baggage from Puerto Rico; and in guava in air cargo from Jamaica.

The Mediterranean fruit fly (*Ceratitis capitata*) in apricot in air stores from France; in avocado in baggage from Hawaii; in cherimoya in air baggage from South America; in cherry in mail from Italy; in coffee in preflight inspection of baggage leaving Hawaii for the mainland; in coffee in baggage from Hawaii; in *Crataegus* sp. in baggage from Italy; in fig in air baggage from Italy; in grape in cargo from the Union of South Africa; in grapefruit in air baggage from Bermuda; in grapefruit in stores from Argentina, Israel, and Italy; in lemon in stores from Italy; in loquat in air baggage from Italy; in Mandarin orange in baggage from Italy; in Mandarin orange in stores from Algeria, Italy, and Spain; in orange in air baggage from Iraq; in orange in air stores from Azores, France, and an unknown origin; in orange in stores from Brazil, Egypt, and Italy; in peach in air baggage from the Azores and Italy; in peach in cargo from the Union of South Africa; in peach in air stores from Argentina; in peach in stores from Italy; in pear in air baggage from Italy and an unknown origin; in pear in baggage from Italy; in pear in air stores from an unknown origin; in persimmon in baggage from Italy; in plum in air baggage from Germany and Italy; in pricklypear in baggage from Greece and Italy. *C. capitata* (?) in Arabian coffee in mail leaving Hawaii for the mainland; in coffee in preflight inspection of baggage leaving Hawaii for the mainland; in guava in air baggage from the Azores; in orange in air baggage from the Madeira Islands; in orange in quarters from Brazil and Gibraltar; in orange in air stores from Israel (?); in orange in stores from Brazil; and in pomegranate in baggage from Italy.

Dacus ciliatus (?) in squash in stores from French West Africa.

The melon fly (*Dacus cucurbitae*) in bell pepper and tomato in stores from Hawaii. *D. cucurbitae* (?) in cucumber in stores from Hawaii.

The oriental fruit fly (*Dacus dorsalis*) in *Actinophloeus macarthurii* (palm) in baggage from Hawaii; an adult on an airplane from Guam; an adult in package containing anthurium and orchid flowers in mail from Hawaii; in coffee in air baggage and mail from Hawaii; in guava in air baggage from Hawaii; in Malay-apple in baggage from Hawaii. *D. dorsalis* (?) in *Calophyllum inophyllum* in mail from Hawaii; in Arabian coffee in air baggage and mail from Hawaii; in coffee in mail from Hawaii; and in fig in air baggage from Hawaii.

The olive fruit fly (*Dacus oleae*) in olive in baggage from Greece and Italy; in olive in air baggage from Italy and Lebanon; and in olive in stores from Italy.

Rhagoletis basiola in rose hips in mail from Canada.

Rhagoletis cerasi in apple in air stores from Italy (?); in cherry in air baggage from France, Germany, Greece, Italy, and an unknown origin; in cherry in baggage from Italy; in cherry in air stores from France, Germany, Italy, Portugal, Spain, and an unknown origin; in cherry in stores from Spain; *R. cerasi* (?) in apple in air stores from an unknown origin; and in cherry in air stores from Italy and the Netherlands.

The cherry maggot (*Rhagoletis cingulata*) in air stores from France.

INSECTS OTHER THAN FRUIT FLIES

The following miscellaneous insects of unusual interest were intercepted:

Acrolepia assectella (Hyponomeutidae) in leek in stores from France, Morocco, and Spain.

The citrus blackfly (*Aleurocanthus woglumi*) on *Citrus* sp. leaf in baggage from Mexico; on decorative greens in cargo from Mexico; on an unknown plant in soil from Mexico; and on sour lime leaf in cargo from Mexico.

Arge ochropa (Argidae) on roses in air baggage from Germany.

Bruchophagus coluteae (Eurytomidae) in *Colutea arborescens* seeds in cargo from Italy.

A carposinid, *Carposina sasakii*, in apple in air baggage, air stores, and quarters from Japan.

The banana root borer (*Cosmopolites sordidus*) in banana in cargo from Mexico.

A phycitid, *Cryptoblabes gnidiella*, in pomegranate in air baggage and baggage from Israel, Italy, and Libya.

Dichocrocis punctiferalis (Pyraustidae) on *Pinus pentaphylla* foliage in cargo from Japan.

Epicaerus cognatus (Curculionidae) in potato in stores from Mexico.

The oriental fruit moth (*Grapholitha molesta*) in peach in air quarters from Japan.

A hydrophilid, *Helophorus rugosus*, in turnip in stores from England.

Hemimene juliana (Olethreutidae) in chestnut in cargo from Italy; and in chestnut in stores from Europe (?).

Lixus junci (Curculionidae) in beet in stores from Egypt.

Mamestra brassicae (Noctuidae) in cabbage in stores from Belgium; in cauliflower in stores from Germany; in celery in stores from England; and in lettuce in stores from Belgium.

A curculionid, *Naupactus xanthographus*, in grape in cargo from Chile.

A scolytid, *Scolytus multistriatus*, in elm bark in cargo from Canada.

The durra stem borer (*Sesamia cretica*) in broomcorn in cargo and quarters from Italy; and in broomcorn in mail from Greece.

Stephanoderes hampei (Scolytidae) in Arabian coffee in mail from Liberia; in *Coffea canephora* in mail from French West Africa; in *Coffea ugandae* in mail from French Equatorial Africa; and in coffee in stores from Angola.

Trogoderma granarium (Dermestidae) with mung beans and sorghum seed in mail from Pakistan; in rice in stores from Brazil, Formosa, Hong Kong, India, Kuwait, and Straits Settlements; and with wheat in stores from Formosa.

SNAILS

Bradybaena similis, an injurious snail not established in the United States, was intercepted 115 times with plant material in baggage, cargo, and mail leaving Hawaii for the mainland and once with lily bulbs in baggage from Bermuda.

Lamellaxis gracilis, injurious in greenhouses and not established in the United States, was found with roots of *Cattleya* sp. in preflight inspection of mail leaving Hawaii for the mainland.

Porphyrobapha iostoma, not injurious under normal conditions and not established in the United States, was taken with bananas in cargo from Ecuador and Honduras.

Theba pisana, an injurious snail not known to be established in the United States, was intercepted with beets in stores from Belgium, on a conex box in air cargo from Morocco, with dunnage in quarters from Morocco, with military cargo from Morocco and Tripoli, and with Swiss chard in stores from Venezuela.

Other snails of economic importance but of limited distribution in the United States and worthy of mention were: *Arion circumscriptus*, *Deroceras reticulatum*, *Limax marginatus*, *L. maximus*, and *Zonitoides orboreus*.

NOTES ON DISEASES INTERCEPTED

The sweet orange scab (*Elsinoe australis*) was intercepted 59 times; 18 of these interceptions came from Argentina on lemon and oranges; 41 from Brazil on grapefruit, lemon, orange, and sweet lime.

Citrus canker (*Xanthomonas citri*) was intercepted 66 times; 58 of these came from Japan, 4 from China, one each from Formosa, Hong Kong, Philippines, and Thailand. These interceptions were made from the following hosts: Grapefruit, lemon, lime, Mandarin orange, orange, pummelo, satsuma orange and sour orange.

Cancrosis B (*Xanthomonas* sp.), another bacterial disease of citrus, producing symptoms similar to citrus canker, was intercepted twice from Argentina on lemon.

The black spot of citrus (*Phoma citricarpa*) was intercepted 132 times; 49 of these came from the Union of South Africa, 26 from Hong Kong, 23 from China, 11 from Australia, 10 from Japan, 3 each from Brazil, Mozambique, and an unknown origin, and one each from Africa, Macao, Pakistan, and the Philippines. These interceptions

were made on the following hosts: *Citrus* sp., grapefruit, lemon, Mandarin orange, orange, and valencia orange.

Other interceptions were:

Corynespora cassicola on palm in cargo from Mexico.

Heterosporium echinulatum on carnation in baggage from Colombia.

Heterosporium iridis on iris leaf in cargo from Canada.

"Leprosis" on lemon in stores from Peru.

Mainsia variabilis on *Rubus* sp. plant in baggage from Colombia.

Melampsora populnea on European aspen in mail from Germany.

Phyllosticta fusco-zonata (?) on *Rubus* sp. leaf in stores from Italy.

Puccinia allii on garlic in stores from Israel.

Septoria antirrhini on snapdragon in mail from France.

Septoria astericola on an aster leaf in mail from England.

Stemphylium botryosum on pepper in stores from Liberia.

Uredo scabies on *Vanilla* sp. leaf and stem in baggage from Panama.

Urocystis cepulea on onion in stores from Israel.

Uromycladium tepperianum on a seed pod of *Acacia aneura* in mail from Australia.

NEMATODES

The oat nematode (*Heterodera major*) was intercepted 15 times from the following countries: Belgium, Denmark, England, Ireland, Italy, Netherlands, Scotland, Spain, and Sweden. These interceptions were taken in soil with *Cymbalaria* sp. plants, soil with garlic, soil with geranium plants, soil with horseradish, soil with jute bagging, soil with surplus military equipment, soil with potatoes, soil with potted plants, and soil with shallots.

The golden nematode (*Heterodera rostochiensis*) was intercepted 85 times from the following countries: Argentina, Belgium, Ecuador, England, Germany, Greece, Iceland, Ireland, Mexico, Netherlands, Peru and Scotland. These interceptions were taken in soil with automobiles, soil on a pair of boots, and in soil with bulbs, plant material, and vegetables.

Other nematodes of special interest were:

Heterodera carotae (?) in soil with carrots in stores from Germany.

Helicotylenchus erythrinae in soil with amaryllis bulbs in air baggage from Portugal; in soil with dahlia roots in air baggage from Scotland; in soil with gladiolus corms and lily bulbs in air baggage from Italy; and in soil with plants in air baggage from Canada.

Pratylenchus minyus in roots of oleander plant in baggage from Austria.

Rotylenchus erythrinae (?) in soil with aloe plants in air baggage from Jamaica.

Rotylenchus reniformis in soil with unidentified bulbs in air baggage from Cuba.

Rotylenchus robustus in soil with carnation and primrose plants and tuberose bulbs in air baggage from England.

Tylenchorhynchus brevidens in soil with primrose plants in air baggage from Ireland.

Other nematodes of possible concern were several species of *Meloidogyne* intercepted from the following countries: Australia, Bahamas, Belgium, Brazil, Canada, Canal Zone, Chile, Costa Rica, Cuba, Dominican Republic, Ecuador, England, France, French West Africa, Germany, Guatemala, Hawaii, India, Jamaica, Japan, Martinique, Mexico, Netherlands, Peru, Thailand, and the Union of South Africa with various plant materials and vegetables.

INCOMPLETELY DETERMINED PESTS

Frequently complete determinations as to species are impossible or impracticable due to the stage or condition of the insects or pathogens on arrival. Some of these pests may be of economic importance, hitherto unreported from the United States, unknown for the host plant, or they may come from a new country of origin. As a matter of record they are included in this separate list but not in the table form.

INSECTS

Among the incompletely determined insects were the following fruit flies:

Anastrepha sp. probably *fraterculus*, at Houston, Tex., in orange in quarters from Brazil; at Jacksonville, Fla., in orange in stores from Brazil; at Miami, Fla., in coffee berry in air baggage from Colombia; at Mobile, Ala., in orange in stores from Brazil;

at New York, N. Y., in orange in air stores from Argentina; and at San Juan, P. R., in sapodilla in air baggage from Brazil.

Anastrepha sp., possibly *ludens*, at Laredo, Tex., in mango and pear in baggage from Mexico; at Miami, Fla., in quince in air baggage from Peru; at New Orleans, La., in orange in baggage and in plum in air baggage from Mexico; at Nogales, Ariz., in orange in baggage from Mexico; and at San Diego, Calif., in orange in air baggage and baggage from Mexico.

Anastrepha sp., possibly *mombinpraeoptans*, at Miami, Fla. in mango in air baggage from Cuba; at Norfolk, Va., in mango in baggage from Puerto Rico; at New Orleans, La., in mombin in baggage from Salvador; and at San Pedro, Calif., in yellow mombin in air baggage from Colombia.

Anastrepha sp., probably *serpentina*, at Brownsville, Tex., Del Rio, Tex., El Paso, Tex., and Laredo, Tex., in maney sapote in baggage from Mexico; at Houston, Tex., in mamey sapote in air baggage from Mexico and in sapodilla in air baggage from Colombia; and at Miami, Fla., in sapodilla in air baggage from Nicaragua.

Anastrepha sp., probably *striata*, at Brownsville, Tex., in guava in air baggage from Colombia and Salvador; at New York, N. Y., in guava in air baggage from the Dominican Republic; at Nogales, Ariz., in guava in baggage from Mexico; and at San Pedro, Calif., in guava in air baggage from Nicaragua.

Anastrepha sp., probably *suspensa*, at Chicago, Ill., in guava in mail from Puerto Rico; at New York, N. Y., in guava in air cargo from Jamaica.

Anastrepha sp. at Baltimore, Md., in orange in stores from Brazil and Peru; at Boston, Mass., in orange in stores from Peru; at Brownsville, Tex., in mango in air baggage from Salvador; in orange and plum in baggage from Mexico; and in star-apple in air baggage from Colombia; at Calexico, Calif., in mango in baggage from Mexico; at Charleston, S. C. in orange in stores from Brazil; at Eagle Pass, Tex., in mamey in baggage from Mexico; at El Paso, Tex., in mamey sapote, sapote, and sweet lime in baggage from Mexico; at Galveston, Tex., in grapefruit in quarters from Brazil and in orange in stores from Argentina and Peru; at Laredo, Tex., in mamey sapote and pear in baggage from Mexico; at Miami, Fla., in guava in air baggage from Salvador; in mamey in air baggage from Mexico; in mango in air baggage from Haiti, Jamaica, and an unknown origin; in mango in air stores from Salvador; and in purple mombin in air baggage from Venezuela; at New Orleans, La., in grapefruit in stores from Jamaica; in guava in mail from Salvador; in mamey sapote in baggage from Guatemala; in purple mombin in air baggage from Guatemala and Mexico; in orange in stores from Argentina and Brazil; in orange in quarters from Brazil; in white sapote in air baggage from Guatemala; and in star-apple in air baggage from Mexico; at New York, N. Y., in *Annona* sp. in air baggage from Brazil; in grapefruit in stores from Argentina; in guava in air baggage from Brazil; in mango in air stores from Colombia; in orange in baggage from Argentina; in sapodilla in air baggage from Colombia and Trinidad; and in sapodilla in mail from Trinidad; at Philadelphia, Pa., in cucurbit in stores from Venezuela; at Port Arthur, Tex., in orange in stores from Peru; at Charlotte Amalie, St. Thomas in grapefruit in stores from Brazil; at San Juan, P. R. in guava in air baggage from Trinidad; in guava in air cargo from the Dominican Republic; in mango in air quarters from Brazil and in air baggage from the Dominican Republic; in nispero in air baggage from Trinidad; and in rose-apple in air baggage from the Dominican Republic; at San Ysidro, Calif., in mango in baggage from Mexico; and at Savannah, Ga., in lemon in stores from Brazil.

Ceratitis sp. at Philadelphia, Pa., in Mandarin orange in stores from Belgian Congo.

Dacus sp. at Honolulu, Hawaii in mango in air baggage from the Philippines and an unknown origin.

Rhagoletis sp., probably *cerasi*, at Boston, Mass., in cherry in air stores from France.

Rhagoletis sp. at Nogales, Ariz., in *Crataegus* sp. in baggage from Mexico; and at Washington, D. C., in rose hips in mail from Iran and Sweden.

An adult *Tephritis* sp. on an airplane leaving Honolulu, Hawaii for the mainland.

Thirty-five interceptions identified to family only, Tephritidae, were intercepted at the following ports: Baltimore, Md., in orange in stores from Brazil; at Boston, Mass., in apple in air baggage from the Azores; in grapefruit in stores from the Union of South Africa; in orange in air stores from Brazil and Spain (?); in peach in cargo from the Union of South Africa; and in pomegranate in air baggage from Greece; at Chicago, Ill., in *Crataegus* sp. in air mail from Germany; in orange in air stores from an unknown origin; at Eagle Pass, Tex., in apple in baggage from Mexico; at El Paso, Tex., in orange in baggage from Mexico; at Galveston, Tex., in vegetable marrow in stores from West Africa; at Hidalgo, Tex., in apple in baggage from Mexico; at Honolulu, Hawaii in coffee berry and in coconut in baggage in preflight inspection of airplanes leaving Hawaii for the mainland; in *Sesbania grandiflora* flower in preflight inspection of mail

leaving Hawaii for the mainland; and in guava in air cargo from the Straits Settlements; at New Orleans, La., in orange in stores from Spain; at New York, N. Y., (pupa) with banana in cargo from Guatemala; in chestnut in baggage from Italy; in European grape in cargo from Argentina; in fig in air baggage from Lebanon; in orange in air stores from the Union of South Africa; and 5 pupae attached to paper in basket of fruit in air baggage from Italy; at Nogales, Ariz., in avocado in baggage from Mexico; and in *Crataegus* sp. in baggage from Mexico; at Port Arthur, Tex., (pupa) on floor of ice box where oranges from Spain had been stored; at San Juan, P. R., in grapefruit in stores from Brazil; at Washington, D. C., (pupae) with *Arnica cordifolia* flower and seed in mail from Canada; in *Ilex mutchagara* berry and in *Meliosma rigida* in mail from Japan; and in rose hips in mail from Sweden.

Other incompletely determined insects worthy of mention were:

Acrolophus sp. (Acrolophidae), presumably a new species, at Nogales, Ariz., with bulbstem yucca in cargo from Mexico.

Aleurocerus sp. (Aleyrodidae), undescribed, at Jacksonville, Fla., on decorative greenery in cargo from Mexico.

An aleyrodid, Aleurodicinae, a new genus near *Aleurodicus*, at Laredo, Tex., on *Epidendrum mariae* plant in cargo; and on an orchid leaf in baggage from Mexico.

An aleyrodid, *Aleurodicus* sp., a new species near *coccolobae* Q. & B., at Miami, Fla., on bauhinia leaf in air baggage from Costa Rica.

Apsychomyrmex sp., a rather rare genus of ants, at Honolulu, Hawaii with orchids in air cargo from Costa Rica.

A tortricid, *Archips* sp., at Houston, Tex., in an apple in air baggage from Mexico.

Aspidiotus sp. (Coccidae), an undescribed species, at Hoboken, N. J., on *Odontoglossum pulchellum* leaf in air cargo from England.

Asterolecaniidae, "pretty surely a new genus and species, superficially, closest to *Mycetococcus*; an interesting collection," at Brownsville, Tex., on cycad in cargo from Mexico.

Baris sp., probably *lepidii* Germ., (Curculionidae) at Houston, Tex., in turnip in stores from France.

Baris sp. at New York, N. Y., in horseradish in air cargo from Poland; in horseradish in cargo from Yugoslavia; and in radish in air stores from Sweden.

A blastobasid, new to the National Museum collection, at Nogales, Ariz., with bulbstem yucca in cargo from Mexico.

Blastodacna sp. (Cosmopterygidae) at Washington, D. C., in *Malus* sp. in mail from France.

A curculionid, *Brachycerus* sp., at New York, N. Y., in *Pancratium* sp. bulb in cargo from Turkey.

A curculionid, *Brachyrhinus* sp., at Hoboken, N. J., in soil with miscellaneous bulbs in mail from Switzerland.

Epicaerus sp. (Curculionidae) at Brownsville, Tex., in potatoes in stores from Mexico; at Eagle Pass., Tex., El Paso, Tex., and Hidalgo, Tex., in potatoes in baggage from Mexico; at Galveston, Tex., and Mobile, Ala., in potatoes in stores from Mexico.

"*Eulia*" sp. (Tortricidae) at New York, N. Y., in grape, nectarine, peach, and plum in cargo from Chile.

A scarabaeid, *Euphoria* sp., new to the National Museum collection, at New Orleans, La., on a bale of sisal in cargo from Mexico.

Euscepes sp. (Curculionidae) at Charleston, S. C., and Houston, Tex., in sweetpotato in stores from Brazil; and in sweetpotato at Honolulu, Hawaii in air baggage from Okinawa.

Furcaspis sp. (Coccidae), an undescribed species, at Brownsville, Tex., on *Chamaedorea* sp. leaf in air cargo from Mexico.

Gelechiid, new to the National Museum collection, at Boston, Mass., in pistache seed in air baggage from Italy.

Grapholitha sp., presumably *molesta* (Olethreutidae), at Philadelphia, Pa., in apple in stores from Japan.

Grapholitha sp., near or = *packardi* Zell. (Olethreutidae), at El Paso, Tex., on *Crataegus* sp. in baggage from Mexico.

An olethreutid, *Gymnandrosoma* sp., near or = *aurantianum* Costa Lima, at Laredo, Tex., in mango in baggage from Mexico; at Houston, Tex., in orange in stores from Argentina; and at New Orleans, La., in purple mombin in air baggage from Mexico.

Lema sp., probably *lichensis* Voet. (Chrysomelidae), at Chicago, Ill., with cut asters in air baggage from Germany.

A curculionid, *Lixus* sp. at Philadelphia, Pa., in stores from Egypt and Italy; and at New York, N. Y., in *Cynara* sp. bud in cargo from Italy.

Mediolata sp. (Stigmaeidae), a unique specimen, at Honolulu, Hawaii on Mandarin orange in air stores from Japan.

A chrysomelid, *Omoplata* sp., new to the National Museum collection, at Galveston, Tex., in banana debris in cargo from Ecuador.

Palaeopus sp. (Curculionidae) at New York, N. Y., in yam in air baggage from British West Indies; and in yam in air cargo from Jamaica.

A coccid, "*Phenacoccus*" sp.—*Phenacoccus* series but not characteristic for the genus and not placed as described—at Hoboken, N. J., on *Ornithogalum* sp. in mail from the Union of South Africa.

Prays sp. (Hyponomeutidae) at Honolulu, Hawaii in *Pelea* sp. in mail leaving Hawaii for the mainland.

A curculionid, *Premnotrypes* sp., at Galveston, Tex., in potato in stores from Peru; and at Mobile, Ala., in potato in stores from Colombia.

Procryptotermes sp. (Kalotermitidae), a new species, at Christiansted, St. Croix in dry tamarind wood in stores from the French West Indies.

Procumbitermes sp. (Termitidae) at New York, N. Y., in nest built of mud in air cargo from Belgian Congo.

Pseudococcus sp. (Coccidae), not placed as a described species, was intercepted 41 times at 13 different ports on various plant material from the following countries: Barbados, Brazil, Canal Zone, Canary Islands, Chile, Costa Rica, Ecuador, Guatemala, India, Indo-China, Japan, Mexico, Peru, Philippines, Spain, and Tortola.

Pseudoparlatoria sp. (Coccidae), not placed as any of the described species, at Hoboken, N. J., on anthurium leaf in air cargo from Colombia.

Puto sp. (Coccidae), probably undescribed, at Brownsville, Tex., and at Laredo, Tex., on anthurium and philodendron in cargo from Mexico; and at Miami, Fla., on an orchid leaf in air cargo from Mexico.

A scolytid, *Scolytus* sp., at New York, N. Y., in unidentified wood in cargo from Sweden.

Steatococcus sp. (Coccidae), not placed as one of the described species but a North American relative of *Icerya*, at Nogales, Ariz., on jumping bean in cargo from Mexico.

DISEASES

Incompletely determined pathogens worthy of mention were:

Ascochyta sp. at Washington, D. C., on a leaf of *Araujia* sp. in mail from Portugal.

Cercospora sp., close to *panacis* Thirum. & Chupp, at Honolulu, Hawaii on *Nothopanax* sp. in air stores from the Fiji Islands.

Cercospora sp. at Miami, Fla., on a leaf of *Cassia moschata* in air mail from the Canal Zone; and at Houston, Tex., on *Chamaedorea* sp. fronds in air cargo from Mexico.

Coniothecium sp. at Laredo, Tex., on *Oncidium* sp. in cargo from Mexico; and at Nogales, Ariz., on cactus in cargo from Mexico.

Coniothyriopsis sp. at Nogales, Ariz., on agave and *Lemaireocereus* sp. in baggage from Mexico and organpipe-cactus in cargo from Mexico.

Coniothyrium sp. at Nogales, Ariz., on orchid in mail from Mexico.

Echidnodes sp. at San Francisco, Calif., on *Laelia superbiens* in cargo from Guatemala.

Helminthosporium sp. at Nogales, Ariz., on cantaloupe in cargo from Mexico.

Hendersonia sp. at Honolulu, Hawaii on *Nothopanax* sp. in air stores from the Fiji Islands.

Hysterographium sp., close to *mori* (Schw.) Rehm, on organpipe-cactus in cargo from Mexico.

Isaria sp. at San Antonio, Tex., on *Chamaedorea oblongata* leaf in air cargo from Mexico.

Leptographium sp. at Nogales, Ariz., on guava in baggage from Mexico.

Leptosphaeria sp. at Laredo, Tex., on agave in baggage from Mexico; at New York, N. Y., on a leaf of *Erythrophleum guineense* in air cargo from Gold Coast; at Philadelphia, Pa., on a leaf of Musaceae in air baggage from Denmark; and at San Pedro, Calif., on Jobs-tears in cargo from Japan.

Lophodermium sp. at Brownsville, Texas, on an orchid leaf in cargo from Mexico.

Microstroma sp. at Hoboken, N. J., on *Pelargonium* sp. leaf in mail from France; and at Philadelphia, Pa., on apple in stores from Egypt.

Neohoehtelia sp. at Washington National Airport, Arlington, Va., on tangerine in air stores from Africa.

Ophiostoma sp. at Hoboken, N. J., on gladiolus in mail from Czechoslovakia.

Pestalotia sp. at Laredo, Tex., on mamey in baggage from Mexico; at San Pedro, Calif., on Jobs-tears in cargo from Japan; and at New Orleans, La., on avocado in air baggage from Salvador.

Phyllosticta sp. at Brownsville, Tex., on *Chamaedorea* sp. in baggage from Mexico; at El Paso, Tex., on a sapote leaf in mail from Mexico; at Miami, Fla., on gardenia leaf in quarters from Cuba; and at San Juan, P. R., on agave in air baggage from St. Martin.

Phyllostictina sp. at Honolulu, Hawaii on *Barringtonia speciosa* in air baggage from Kwajalein.

Rhytisma sp. at Washington, D. C., on Japanese azalea in mail from Japan.

Septonema sp., close to *toruloides* Cke. & Ell., at Laredo, Tex., on *Chamaedorea* sp. in cargo from Mexico.

Septoria sp. at Brownsville, Tex., on philodendron in cargo from Mexico; at Laredo, Tex., on avocado in baggage from Mexico; at Nogales, Ariz., on yucca in cargo from Mexico; and at San Pedro, Calif., on an oak leaf in air baggage from Denmark.

Stachybotrys sp., probably *atrata* Cda., at Nogales, Ariz., on cantaloupe in cargo from Mexico.

Uredo sp. at Miami, Fla., on *Tillandsia* sp. leaf in air baggage from Mexico; and on *Trigonidium seemannii* leaf in air mail from the Canal Zone.

Verticillium sp. at Philadelphia, Pa., on a willow twig in quarters from the Netherlands.

Zygosporium sp., probably *oschioides* Mont., at Brownsville, Tex., on *Chamaedorea* sp. leaf in air cargo from Mexico.

NEMATODES

Aphelenchoides sp. at Boston, Mass., with amaryllis bulbs in air baggage from Bermuda; in beet in stores from the Netherlands; in celeriac in stores from Germany; with holly cutting in air baggage from Ireland; in lily-of-the-valley pips in air baggage from England; in oak timber in cargo from England; in onion in air baggage and cargo from Italy; in soil with cactus plant in baggage from Canada; in soil with carrots, parsnips, and potatoes in stores from Argentina; in soil with hydrangea plant in air baggage from Iran; in soil with rosemary plant in air baggage from Italy; and with potatoes in stores from Poland; at Key West, Fla., in soil from an automobile from Cuba; at Miami, Fla., in soil with aloe, croton, and an unknown plant in air baggage from Jamaica; in soil with cactus plants in air baggage from Brazil; in soil with carrots in stores from Germany; and in soil with an unknown plant in air baggage from Panama; at Newport News, Va., in soil with lily bulbs in cargo from Japan; at Nogales, Ariz., with a coleus plant in baggage from Mexico; at Norfolk, Va., in unknown flower bulbs and lily bulbs in cargo from Japan; at Pensacola, Fla., in soil in potato bin in stores from Belgium; and at San Francisco, Calif., with roots of tree peonies in cargo from Japan.

Aphelenchus sp. at Boston, Mass., in soil with cactus plant in baggage from Canada; in soil with carnation plants in air baggage from Greece; in soil with carrots in stores from Australia; in soil with carrots, parsnips, and potatoes in stores from Argentina; with celery in stores from the Union of South Africa; with horseradish in stores from Japan; in soil with onions in cargo from Italy; in soil with peanuts in mail from Barbados; in soil with miscellaneous plants in air baggage from Portugal; in soil with potatoes in stores from Poland; and with tulip bulbs in baggage from the Netherlands; at Key West, Fla., in soil with sansevieria plant in baggage from Cuba; at Miami, Fla., in soil with beadplant in baggage from France; in soil with garlic in stores from Israel and Italy; in soil with iris plants in air baggage from Cuba; in soil with mint plants in air baggage from Cuba; in soil with orchid plants in air baggage from Colombia; and in soil with unknown plants in air baggage from Jamaica and Panama; at New Orleans, La., in soil with an undetermined legume in air baggage from Jamaica; at Pensacola, Fla., in soil with carrots in stores from England; at San Diego, Calif., in gladiolus corm in baggage from Mexico; and at Tampa, Fla., in soil with beets in stores from Germany.

Ditylenchus sp. at Boston, Mass., in soil with cactus plants in baggage from Canada; in soil with carnation and primrose plants and tuberose bulbs in air baggage from England; in soil with oleander plants in air baggage from Ireland; in soil with onions in cargo from Italy; and in soil with unidentified plants in air baggage from Portugal; at Hoboken, N. J., in *Tigridia* sp. bulbs in mail from the Netherlands; at Key West, Fla., in soil from an automobile from Cuba; and at Miami, Fla., in soil with assorted plants in air baggage from Honduras.

Helicotylenchus sp. at Boston, Mass., in soil with hydrangea plants in air baggage from Iran; in soil with unknown plants in baggage from Brazil; at Laredo, Tex., in caladium and philodendron roots in baggage from Mexico; at Miami, Fla., in soil with assorted plants in air baggage from Costa Rica; and in soil with violet roots in air baggage from Costa Rica.

Heterodera sp., possibly *major*, at New York, N. Y., in soil with *Monarda didyma* plants in baggage from England.

Heterodera, new species, at Miami, Fla., in soil with beadplant in baggage from France.

Other members of the genus *Heterodera* were intercepted 360 times at 26 ports from the following countries: Argentina, Azores, Belgium, Brazil, Canada, Canary Islands, Denmark, Egypt, England, France, Germany, Greece, Hong Kong, Hungary, India, Iran, Ireland, Israel, Italy, Japan, Lebanon, Liberia, Malta, Mexico, Morocco, Netherlands, New Zealand, Norway, Philippines, Poland, Portugal, Scotland, Spain, Sweden, Switzerland, Union of Soviet Socialistic Republics, and Yugoslavia. These interceptions were made from soil samples; soil with new and used automobiles; soil with army vehicles; soil with potatoes in railway car; soil in sweeping from a railway car; soil with bulbs and tubers in baggage, cargo, and mail; soil with plant material in baggage and mail; and in soil with vegetables in cargo and stores.

Hoplolaimus sp. at Laredo, Tex., with roots of Indian rubber tree in cargo from Mexico; and at Boston, Mass., in soil with wallflowers in baggage from Ireland.

Meloidogyne sp., perhaps *javanica*, at Miami, Fla., in soil with assorted plants in air baggage from Honduras.

Meloidogyne sp. at Boston, Mass., with celery in stores from the Union of South Africa; and in soil with plants in air baggage from Greece; at Brownsville, Tex., in root gall on dracaena plant in baggage from Mexico; at Hoboken, N. J., in *Achimenes* spp. tubers in air cargo from the Netherlands; in *Aconitum napellus*, *Ajuga reptans atropurpurea*, and *Anaphalis triplinervis* roots in cargo from the Netherlands; in *Begonia rex* roots in air mail from England; in calla tubers in cargo from Italy; in *Ceanothus* sp. roots in cargo from the Netherlands; in *Caladium candidum* tubers in cargo from Guatemala; in clematis in cargo from the Netherlands; in *Columnea pilosissima* roots in mail from Scotland; in *Epimedium* sp. roots in cargo from England; in *Genista lydia* roots in air cargo from England; in geranium roots in mail from France; in gerbera roots in air cargo from India; in ginger roots in mail from Peru; in hepatica roots in mail from England; in Japanese iris roots in cargo from Japan; in *Kaempferia rotunda* tubers in mail from the Netherlands; in *Kaempferia* sp. tubers in cargo from India; in passion flower roots in mail from Bermuda; and in roots of roses in mail from France; at Laredo, Tex., in philodendron and spiraea roots in baggage from Mexico; at Miami, Fla., in acacia roots in air mail from Venezuela; in beadplant in baggage from France; and in soil with African violets in air baggage from Ecuador; and at New York, N. Y., in aster roots in quarters from Japan.

Nothotylenchus sp. at Boston, Mass., in soil with hydrangea plant in air baggage from Iran; and at Key West, Fla., in sample of soil from Cuba.

Paratylenchus sp. at Miami, Fla., in soil with celery in stores from Germany; and in soil with sansevieria plant in air baggage from Haiti.

Pratylenchus, new species, at Miami, Fla., in beadplant in baggage from France.

Pratylenchus sp. at Boston, Mass., in dahlia root in air baggage from Italy; in soil with dwarf pine in quarters from Japan; in soil with potatoes in stores from Argentina; at Brownsville, Tex., in soil with a begonia plant in air baggage from Nicaragua; at Hoboken, N. J., in *Helleborus niger maximus* roots in air cargo from the Netherlands; in Japanese iris roots in cargo from Japan; in roots of *Ranunculus acris* Double in mail from Germany; at Laredo, Tex., in begonia tubers in baggage from Mexico; at Miami, Fla., in garlic in stores from Italy; at New York, N. Y., in lily-of-the-valley pips in baggage from Italy; at San Francisco, Calif., in lily-of-the-valley pips in cargo from Denmark and Germany and in mail from Denmark; and at Washington, D. C., in a soil sample in mail from Colombia.

Psilenchus sp. at Boston, Mass., in soil with leek in stores from Egypt.

Rotylenchus, new species, at Key West, Fla., in soil with sansevieria plant in baggage from Cuba; and at Miami, Fla., in soil with celery in stores from France.

Rotylenchus sp. at Boston, Mass., in soil with carnation plants in air baggage from the Azores; in soil with lily-of-the-valley pips in air baggage from England; and in soil with violet plants in air baggage from Italy; at Miami, Fla., in soil with celery in stores from Germany; at New Orleans, La., in soil with legumes in air baggage from Jamaica; and at New York, N. Y., in soil with citrus tree and olive tree in baggage from Italy.

Tylenchorhynchus sp., possibly *clarus* Allen, at Boston, Mass., in soil with celery in stores from Egypt.

Tylenchorhynchus, new species, at Miami, Fla., in soil with roots of an unknown plant in air baggage from Jamaica.

Tylenchorhynchus sp. at Boston, Mass., in soil with carnation and primrose plants and tuberose bulbs in air baggage from England; in soil with carnation plant and in soil with onion sets in air baggage from Italy; at Miami, Fla., in soil with celery in stores from Germany; in soil with garlic in stores from Italy; and in soil with iris plant in air

baggage from Cuba; and at Tampa, Fla., in soil with unidentified bulbs in air baggage from Cuba.

Tylenchus, new species, at Miami, Fla., in soil with violet plants in air baggage from Costa Rica.

Tylenchus sp. at Boston, Mass., in soil on an automobile from England; in soil with azalea, fuchsia, ivy, and tradescantia plants in air baggage from Germany; in soil with carnation plants in air baggage from Italy; in soil with holly cuttings in air baggage from Ireland; and with oak timber in cargo from England; at Key West, Fla., in soil on an automobile from Cuba; and in soil with sansevieria plant in baggage from Cuba; at Miami, Fla., in soil with carrots in stores from Germany; in soil with caladium, lily, mint, and peperomia plants in air baggage from Panama; in soil with copperleaf plant in air baggage from Cuba; and in soil with sansevieria plant in air baggage from Haiti; at New Orleans, La., in soil with undetermined legume in baggage from Jamaica; at New York, N. Y., in soil with citrus and olive trees in baggage from Italy; and at Tampa, Fla., in soil with unidentified bulbs in air baggage from Cuba.

Xiphinema sp., near *index* Thorne & Allen, at Miami, Fla., in soil with carnation plant in air baggage from Cuba.

Xiphinema sp. at Miami, Fla., in soil with codium plant in air baggage from Colombia.

Summary of Numbers of Interceptions Listed in Main Table

Country	Insect	Disease	Country	Insect	Disease
	<i>Number</i>	<i>Number</i>		<i>Number</i>	<i>Number</i>

¹ This total represents only pests of known or potential plant-quarantine importance or certain organisms of scientific importance. The total of all interceptions made during the year was 15,058.

NOTE.—Interceptions were also made from Aruba, Belgian Congo, British West Indies, Burma, Cameroons, Canary Islands, Canton Island, Ceylon, Christmas Island, Fanning Island, Fiji Islands, French West Africa, French West Indies, Ghana, Greenland, Hungary, Indo-China, Java, Johnston Island, Kenya, Korea, Malta, Nepal, Nevis, New Caledonia, Okinawa, Rhodesia, Sumatra, and Union of Soviet Socialist Republics.

Pests collected and reported from July 1, 1956, through June 30, 1957

[An asterisk indicates State inspection]

Pest and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Non-entry	Propagation	
<i>Acanthoscelides armitagei</i> (Pic) (Bruchidae):					
<i>Cajanus</i> sp.-----	Panama-----	1	-----	-----	N. Y.
<i>Pisum sativum</i> (pea)-----	do-----	2	-----	-----	Fla.
" <i>Acanthoscelides</i> " <i>spinipes</i> (Er.) (Bruchidae):					
Legume-----	Greece-----	-----	-----	1	N. J.
<i>Aceria macrochelus</i> (Nal.) (Eriophyidae):					
<i>Acer</i> sp. (maple)-----	England-----	-----	3	-----	Mass.
<i>Acidia heraclei</i> (L.) (?) (Tephritidae):					
<i>Apium graveolens</i> (celery)-----	France-----	-----	2	-----	Va.
<i>Acrolepia assectella</i> (Zell.) (Hyponomeutidae):					
<i>Altium porrum</i> (leek)-----	France, Morocco, Spain-----	-----	3	-----	Pa.
<i>Adelphocoris seticornis</i> (F.) (Miridae):					
<i>Trifolium agrarium</i> (hop clover)-----	Switzerland-----	-----	-----	1	D. C.
<i>Adoretus sinicus</i> Burm. (Scarabaeidae):					
Flowers-----	Hawaii-----	1	-----	-----	Hawaii.
<i>Hibiscus</i> sp.-----	do-----	1	-----	-----	Hawaii.
<i>Phajus</i> sp. (orchid)-----	do-----	1	-----	-----	Hawaii.
<i>Adoxophyes orana</i> (F. R.) (Tortricidae):					
<i>Syringa</i> sp. (lilac)-----	Netherlands-----	15	-----	-----	N. Y.
<i>Aganactesis indecora</i> Dyar (Galleriidae):					
<i>Cassia fistula</i> (golden-shower)-----	Dominican Republic-----	1	-----	-----	P. R.
<i>Aglossa cuprealis</i> Hbn. (Pylalidae):					
<i>Allium sativum</i> (garlic)-----	Italy-----	1	-----	-----	N. Y.
Herbs and plants in soil-----	Portugal-----	-----	-----	1	N. Y.
<i>Sansevieria</i> sp.-----	do-----	1	-----	-----	N. Y.
<i>Agroiconota propinqua</i> (Boh.) (Chrysomelidae):					
<i>Ananas comosus</i> (pineapple)-----	Dominican Republic-----	-----	-----	4	P. R.
<i>Aleurocanthus woglumi</i> Ashby (Aleyrodidae):					
<i>Citrus aurantifolia</i> (sour lime)-----	Mexico-----	2	-----	-----	Tex.
<i>Citrus</i> sp.-----	Mexico, Nicaragua-----	7	-----	-----	Tex.
Greens—decorative-----	Mexico-----	1	-----	-----	Fla.*
Plant—undetermined-----	do-----	-----	-----	1	Ariz.
<i>Aleuroplatus mammaeferus</i> Q. & B. (Aleyrodidae):					
<i>Codiaeum</i> sp. (croton)-----	Australia (?)-----	1	-----	-----	Hawaii.
<i>Aleurothrixus floccosus</i> (Mask.) (Aleyrodidae):					
<i>Psidium guajava</i> (guava)-----	Mexico-----	1	-----	-----	Tex.
<i>Aleurotuberculatus aucubae</i> (Kuw.) (Aleyrodidae):					
<i>Citrus aurantium</i> var.-----	Japan-----	-----	1	-----	Calif.*
<i>Alpheias conspirata</i> Hein. (Galleriidae):					
<i>Ananas comosus</i> (pineapple)-----	Mexico-----	3	-----	-----	Tex.
<i>Anastrepha fraterculus</i> (Wied.) (Tephritidae):					
<i>Prunus persica</i> (peach)-----	Peru-----	1	-----	-----	Fla.
<i>Anastrepha ludens</i> (Loew) (Tephritidae):					
<i>Casimiroa edulis</i> (white sapote)-----	Mexico-----	3	-----	-----	N. Y., Tex.
<i>Citrus aurantifolia</i> (sweet lime)-----	do-----	9	-----	-----	Tex.
<i>Citrus limon ponderosa</i> (ponderosa lemon)-----	do-----	1	-----	-----	Tex.
<i>Citrus paradisi</i> (grapefruit)-----	British Honduras, Mexico-----	15	3	-----	Fla.*, Tex.
<i>Citrus reticulata</i> (Mandarin orange)-----	Mexico-----	1	-----	-----	Tex.
<i>Citrus sinensis</i> (orange)-----	Guatemala, Mexico-----	128	8	-----	Ariz., Calif., Calif.*, La., Tex.
<i>Cydonia oblonga</i> (quince)-----	Mexico-----	4	-----	-----	Tex.
<i>Malus sylvestris</i> (apple)-----	do-----	2	-----	-----	Tex.
<i>Mangifera indica</i> (mango)-----	Guatemala, Mexico-----	70	1	-----	Ariz., Calif., Calif.*, La., Tex.
<i>Prunus persica</i> (peach)-----	Mexico-----	1	-----	-----	Tex.
<i>Pyrus communis</i> (pear)-----	do-----	9	-----	-----	Tex.
<i>Anastrepha ludens</i> (Loew) (?) (Tephritidae):					
<i>Calocarpum sapota</i> (mamey sapote)-----	do-----	1	-----	-----	Tex.
<i>Mangifera indica</i> (mango)-----	do-----	1	-----	-----	Tex.
<i>Anastrepha mombinpraeoptans</i> Sein (Tephritidae):					
<i>Eugenia floribunda</i> (guava berry)-----	Tortola-----	2	-----	-----	St. Croix, St. Thomas & St. John

Pests collected and reported from July 1, 1956, through June 30, 1957—Continued

[An asterisk indicates State inspection]

Pest and host	Country of origin	Number of interceptions in—			Collected in—
		Consumption	Non-entry	Prop. ga- tion	
<i>Mangifera indica</i> (mango)-----	Antigua, British Honduras, Costa Rica, Cuba, Dominican Republic, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Puerto Rico, St. Kitts, Salvador, Tortola, Trinidad, unknown.	121	6	---	Ala., Calif., Calif.*, Fla., Fla.*, Ga., La., N. Y., St. P. R., St. Croix, St. Thomas & St. John, Tex., Va.
<i>Psidium guajava</i> (guava)-----	Cuba, Guatemala, Mexico, Tortola.	8	---	---	Calif.*, Fla.*, St. Thomas & St. John, Tex.
<i>Spondias mombin</i> (yellow mombin)-----	Central America, Dominican Republic, Guatemala, Nicaragua, St. Martin, Salvador.	18	---	---	Calif.*, La., P. R. Tex.
<i>Spondias purpurea</i> (purple mombin)-----	Guatemala, Mexico, Nicaragua.	7	---	---	La., Tex.
<i>Spondias</i> sp. (mombin)-----	British Honduras, Guatemala, Salvador.	6	---	---	La., Tex.
<i>Terminatia catappa</i> (bitter-almond)-----	Dominican Republic	---	1	---	Pa.
<i>Anastrepha mombinpraeoptans</i> Sein (?) (Tephritidae):					
<i>Mangifera indica</i> (mango)-----	Ecuador, Venezuela	1	1	---	La., Pa.

<i>Calocarpum sapota</i> (mamey sapote)-----	Colombia, Mexico, Nicaragua.	4	2	---	Calif.*, La., Tex.
<i>Mammea americana</i> (mamey)-----	Mexico	1	---	---	Calif.*
<i>Anastrepha striata</i> Schin. (Tephritidae):					
<i>Psidium guajava</i> (guava)-----	Guatemala, Mexico, Puerto Rico, Salvador.	5	---	---	Ariz., Ill., La., Tex.
<i>Anastrepha suspensa</i> (Loew) (Tephritidae):					
<i>Psidium guajava</i> (guava)-----	Jamaica, Puerto Rico	8	---	---	N. Y., P. R.
<i>Ancylostomia stercorea</i> (Zell.) (Phycitidae):					
<i>Cajanus cajan</i> (pigeonpea)-----	Bahamas, Dominican Republic, Haiti, Jamaica, Jost Van Dyke, Panama, St. Kitts, Tortola, Trinidad.	18	1	---	Fla.*, N. Y., P. R., St. Thomas & St. John.
<i>Pisum sativum</i> (pea)-----	Jamaica, Panama, Puerto Rico.	4	---	---	Fla.*, Ill.
<i>Antispila rivillei</i> (Stt.) (?) (Heliozelidae):					
<i>Vitis</i> sp. (grape)-----	Italy	1	---	---	Mass.
<i>Anuraphis cardui</i> (L.) (Aphidae):					
<i>Chrysanthemum</i> sp.-----	England	---	---	1	N. J.
<i>Cynara scolymus</i> (globe artichoke)-----	Algeria	---	1	---	La.
<i>Anuraphis tulipae</i> (Fonsc.) (Aphidae):					
<i>Apium graveolens</i> (celery)-----	Egypt	---	1	---	Pa.
<i>Iris subbiflora</i> (Portugal iris)-----	Portugal	---	---	1	D. C.
<i>Iris</i> sp.-----	England	---	---	2	N. J.
<i>Tigridia lutea immaculata</i> -----	Netherlands	---	---	1	N. J.
<i>Tulipa</i> sp. (tulip)-----	do	---	1	1	Tex.
<i>Araecerus levipennis</i> Jord. (Anthribidae):					
<i>Leucaena glauca</i> -----	Hawaii	11	---	---	Hawaii.
<i>Arctothezia cataphracta</i> (Olaf.) (Coccidae):					
<i>Erica</i> sp. (heath)-----	Scotland	1	---	---	Mass.
Forest litter-----	do	---	---	1	Wash.
<i>Ardis sulcata</i> (Cam.) (Tenthredinidae):					
<i>Rosa</i> sp. (rose)-----	Germany	---	1	---	Pa.
<i>Arge ochropa</i> Gmel. (Argidae):					
<i>Rosa</i> sp. (rose)-----	do	1	---	---	Ill.

Pests collected and reported from July 1, 1956, through June 30, 1957—Continued

Pachyzancla bipunctalis (Lepidoptera)

AMMI:

Systole geniculata (Hymenoptera)

ANANAS:

Agroiconota propinqua (Coleoptera)*Alpheias conspirata* (Lepidoptera)*Blissus teucopteris insularis* (Hemiptera)*Brevipalpus phoenicis* (Acarina)*Euetheola bidentata* (Coleoptera)*Ribua innoxia* (Lepidoptera)*"Targionia" bromiliae* (Homoptera)*Thecla ziba* (Lepidoptera)*Xylobiops texanus* (Coleoptera)

ANDROPOGON:

Nysius vinitor (Hemiptera)

ANNONA:

Bephrata maculicollis (Hymenoptera)*Ceratitis capitata* (Diptera)*Cerconota anonella* (Lepidoptera)*Iridomyrmex humilis* (Hymenoptera)*Pseudococcus lilacinus* (Homoptera)*Talponia batesi* (Lepidoptera)

ANTHURIUM:

Bradybaena similis (Mollusca)*Cercoplastes rubens* (Homoptera)*Pulvinaria psidii* (Homoptera)

ANTIRRHINUM:

Prodenia ornithogalli (Lepidoptera)

APIUM:

Acidia heraclei (?) (Diptera)*Anuraphis tulipae* (Homoptera)*Deroceras reticulatum* (Mollusca)*Mamestra brassicae* (Lepidoptera)

ARACHIS:

Caryedon fuscus (?) (Coleoptera)

ARCTOSTAPHYLOS:

Gynaikothrips ficorum (Thysanoptera)

ARCTOTIS:

Microcephalothrips abdominalis (Thysanoptera)

ASPASIA:

Vinsonia stellifera (Homoptera)

ASTER:

Frankliniella intonsa (Thysanoptera)*Taeniothrips atratus* (Thysanoptera)

BAMBOO:

Asterolecanium milaris robustum (Homoptera)*Chaetococcus bambusae* (Homoptera)

BETA:

Gnorimoschema ocellatella (Lepidoptera)*Lixus junci* (Coleoptera)*Theba pisana* (Mollusca)

BRASSAVOLA:

Furcaspis biformis (Homoptera)*Vinsonia stellifera* (Homoptera)

BRASSIA:

Tenthecoris distinguendus (Hemiptera)*Vinsonia stellifera* (Homoptera)

BRASSICA NAPOBRASSICA:

Ceutorhynchus pleurostigma (Coleoptera)

BRASSICA OLERACEA BOTRYTIS:

Deroceras reticulatum (Mollusca)*Evergestis rimosalis* (Lepidoptera)*Mamestra brassicae* (Lepidoptera)*Phytomyza rufipes* (Diptera)*Pieris brassicae* (Lepidoptera)

BRASSICA OLERACEA BULLATA:

Deroceras reticulatum (Mollusca)

BRASSICA OLERACEA CAPITATA:

Deroceras reticulatum (Mollusca)*Limax marginatus* (Mollusca)*Limax maximus* (Mollusca)*Mamestra brassicae* (Lepidoptera)*Phytomyza rufipes* (Diptera)*Pieris brassicae* (Lepidoptera)

BRASSICA OLERACEA GONGYLODES:

Phytomyza rufipes (Diptera)

BRASSICA RAPA:

Hellula undalis (Lepidoptera)*Helophorus rugosus* (Coleoptera)*Phytomyza rufipes* (Diptera)

BROMELIAD:

Cryphula apicalis (Hemiptera)*Furcaspis biformis* (Homoptera)*Galgupha punctifer* (Hemiptera)

BROUGHTONIA:

Vinsonia stellifera (Homoptera)

BUXUS:

Eriophyes canestrinii (Acarina)*Psylla buxi* (Homoptera)

CACTUS:

Aufeius impressicollis (Hemiptera)*Lepidosaphes philococcus* (Homoptera)*Orthezia cacticola* (Homoptera)*Texananus spatulatus* (Homoptera)

CAJANUS:

Acanthoscelides armitagei (Coleoptera)*Ancylostomia stercorea* (Lepidoptera)*Callosobruchus phaseoli* (Coleoptera)*Chalcodermus aeneus* (Coleoptera)*Maruca testulalis* (Lepidoptera)

CALLUNA:

Gelechia ericetella (Lepidoptera)*Micrelus ericae* (Coleoptera)*Orthotylus ericetorum* (Hemiptera)*Taeniothrips atratus* (Thysanoptera)*Taeniothrips ericae* (Thysanoptera)*Thrips flavus* (Thysanoptera)

CALOCARPUM:

Anastrepha ludens (?) (Diptera)*Anastrepha serpentina* (Diptera)

CALOPHYLLUM:

Dacus dorsalis (?) (Diptera)

CAMARIDIUM:

Vinsonia stellifera (Homoptera)

CAMELLIA:

Aspidiotus degeneratus (Homoptera)*Brevipalpus inornatus* (Acarina)*Lepidosaphes tubulorum* (Homoptera) (As defined by Kuwana)*Parlatoria camelliae* (Homoptera)*Xylosandrus germanus* (Coleoptera)

CANAVALLIA:

Lampides boeticus (Lepidoptera)*Maruca testulalis* (Lepidoptera)

CAPSICUM:

Dacus cucurbitae (Diptera)*Epinotia aporema* (Lepidoptera)*Gnorimoschema gudmannella* (Lepidoptera)*Neoleucinodes elegantalis* (Lepidoptera)*Pachyzancla periusalis* (Lepidoptera)*Phenacoccus parvus* (Homoptera)*Platynota rostrana* (Lepidoptera)*Pyrausta nubilalis* (Lepidoptera)

CASIMIROA:

Anastrepha ludens (Diptera)

Hosts and Insects—Continued

CASSIA:

- Aganactesis indecora* (Lepidoptera)
- Caryedon fuscus* (Coleoptera)
- Fundella pellucens* (Lepidoptera)

CASTANEA:

- Curculio elephas* (Coleoptera)
- Hemimene juliana* (Lepidoptera)
- Laspe resia splendana* (Lepidoptera)

CATASETUM:

- Deroceras reticulatum* (Mollusca)
- Limax marginatus* (Mollusca)
- Vinsonia stellifera* (Homoptera)

CATTLEYA:

- Farinococcus guatemalensis* (Homoptera)
- Furcaspis biformis* (Homoptera)
- Helix aspersa* (Mollusca)
- Lamellacis gracilis* (Mollusca)
- Pseudischnaspis alienus* (Homoptera)
- Zonitoides arboreus* (Mollusca)

CERATONIA:

- Ectomyelois ceratoniae* (Lepidoptera)

CERCIDIUM:

- Xylobius texanus* (Coleoptera)

CHAMAEDOREA:

- Caulophilus latinasus* (Coleoptera)
- Chrysomphalus sphaerioides* (Homoptera)
- Coelonertus nigrirostris* (Coleoptera)
- Metriopis erratica angularis* (Coleoptera)

CHRYSALIDOCARPUS:

- Cocco rypes carpophagus* (Coleoptera)

CHRYSANTHEMUM:

- Anuraphis ca dui* (Homoptera)
- Frankliniella ispinosa* (Thysanoptera)
- Frankliniella formosa* (Thysanoptera)
- Homoeosoma electellum* (Lepidoptera)
- Microcephalothrips abdominalis* (Thysanoptera)

CICHORIUM:

- Deroceras reticulatum* (Mollusca)
- Phytomyza rufipes* (Diptera)

CINNAMOMUM:

- Protopulvinaria pyriformis* (Homoptera)

CITRUS AURANTIFOLIA:

- Aleurocanthus woglumi* (Homoptera)
- Anastrepha ludens* (Diptera)
- Coccus viridis* (Homoptera)
- Dysdercus mimus* (Hemiptera)
- Leucaspis cockerelli* (Homoptera)
- Morganella longispina* (Homoptera)
- Pseudischnaspis bowreyi* (Homoptera)
- Unaspis citri* (Homoptera)

CITRUS AURANTIUM:

- Unaspis yanonensis* (Homoptera)

CITRUS AURANTIUM VAR.:

- Aleurotuberculatus aucubae* (Homoptera)

CITRUS GRANDIS:

- Glycyphagus domesticus* (Acarina)
- Parlatoria zizyphus* (Homoptera)

CITRUS LIMON:

- Ceratitis capitata* (Diptera)
- Chrysomphalus personatus* (Homoptera)
- Leucaspis cockerelli* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS LIMON VAR. PONDEROSA:

- Anastrepha ludens* (Diptera)

CITRUS PARADISI:

- Anastrepha ludens* (Diptera)
- Ceratitis capitata* (Diptera)
- Parlatoria cinerea* (Homoptera)
- Pseudanidia trilobitiformis* (Homoptera)
- Unaspis citri* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS RETICULATA:

- Anastrepha ludens* (Diptera)
- Ceratitis capitata* (Diptera)
- Chrysomphalus bifasciculatus* (Homoptera)
- Parlatoria cinerea* (Homoptera)
- Parlatoria zizyphus* (Homoptera)
- Unaspis citri* (Homoptera)
- Unaspis yanonensis* (Homoptera)

CITRUS RETICULATA UNSHIU:

- Unaspis yanonensis* (Homoptera)

CITRUS SINENSIS:

- Anastrepha ludens* (Diptera)
- Ceratitis capitata* (Diptera)

- Chrysomphalus bifasciculatus* (Homoptera)

- Chrysomphalus personatus* (Homoptera)

- Dialeurodes citri* (Homoptera)

- Exptochiomeria confusa* (Hemiptera)

- Leucaspis cockerelli* (Homoptera)

- Parlatoria cinerea* (Homoptera)

- Parlatoria zizyphus* (Homoptera)

- Unaspis citri* (Homoptera)

- Unaspis yanonensis* (Homoptera)

CITRUS SP:

- Aleurocanthus woglumi* (Homoptera)

COCOS:

- Aspid otus destructor* (Homoptera)
- Diocalandra taitensis* (Coleoptera)
- Ereunetis flavistriata* (Lepidoptera)
- Pinnaspis buxi* (Homoptera)
- Pseudococcus palmarum* (Homoptera)
- Pseudococcus palmarum oceanicus* (Homoptera)

CODIAEUM:

- Aleuroplatus mammaeferus* (Homoptera)
- Lepidosaphes tokionis* (Homoptera)
- Pantomorus godmani* (Coleoptera)
- Parlatoria crotonis* (Homoptera)

COFFEA:

- Ceratitis capitata* (Diptera)
- Dacus dorsalis* (Diptera)
- Leucoptera coffeella* (Lepidoptera)
- Protopulvinaria pyriformis* (Homoptera)
- Stephanoderes hampei* (Coleoptera)

COLOCASIA:

- Bradybaena similis* (Mollusca)

COLUTEA:

- Bruchophagus coluteae* (Hymenoptera)

CONOSPERMUM:

- Asterolecanium petrophilae* (Homoptera)

COPAIFERA:

- Platypus rugulosus* (Coleoptera)

CORDYLINE:

- Bradybaena similis* (Mollusca)
- Deroceras reticulatum* (Mollusca)
- Pantomorus godmani* (Coleoptera)
- Pinnaspis buxi* (Homoptera)
- Plusia chalcites* (Lepidoptera)

CORYLUS:

- Curculio nucum* (Coleoptera)

CRATAEGUS:

- Ceratitis capitata* (Diptera)
- Lecanium corni* (Homoptera)

CUCUMIS:

- Dacus cucurbitae* (?) (Diptera)
- Deroceras reticulatum* (Mollusca)

CUCURBITA:

- Dacus ciliatus* (Diptera)
- Ogdoecosta catenulata* (Coleoptera)
- Tetranychus cinnabarinus* (Acarina)
- Trogoderma inclusum* (Coleoptera)

CYCNOCHES:

- Puto ulter* (Homoptera)

CYDONIA:

- Anastrepha ludens* (Diptera)
- Ectomyelois ceratoniae* (Lepidoptera)
- Euzophera bigella* (?) (Lepidoptera)

GUAM:

Phomopsis palmicola

GUATEMALA:

*Camarosporium orchidicola**Meloidogyne arenaria**Pestalotia conspicua**Uredo epidendri* (?)*Uredo guacae* (?)*Uredo oncidii*

HAITI:

†*Helicotylenchus nannus**Paraphelenchus amblyurus* (?)

HAWAII:

†*Meliola acervata*†*Meloidogyne javanica**Uromyces alyxiae*

HONDURAS:

†*Phyllosticta cajani**Uredo oncidii*

HONG KONG:

†*Meloidogyne javanica*†*Phoma citricarpa*†*Xanthomonas citri*

ICELAND:

Heterodera punctata†*Heterodera rostochiensis*

INDIA:

Coleosporium bletiae†*Meloidogyne javanica**Physalospora wildemanniana*†*Plicaria fulva*

INDONESIA:

†*Pestalotia conspicua*

IRAN:

†*Pratylenchus penetrans*†*Pratylenchus pratensis*

IRELAND:

*Heterodera major**Heterodera punctata**Heterodera rostochiensis**Septoria petroselin*†*Tylenchorhynchus brevidens*

ISRAEL:

†*Puccinia allii*†*Urocystis cepulae*

ITALY:

Colletotrichum agaves†*Colletotrichum trichellum**Corynium carpophilum**Ditylenchus dipsaci**Erwinia citrimaculans*†*Gloeosporium album**Helicotylenchus erythrinae**Heterodera cacti**Heterodera major**Heterodera punctata**Macrophoma oleae**Marssonina juglandis**Meloidogyne javanica**Mycosphaerella fragariae**Phoma limonii*†*Phyllosticta fusco-zonata* (?)†*Pratylenchus vulnus**Sclerotium cepivorum**Scutellonema brachyurum**Septoria citri**Tylenchus filiformis*

JAMAICA:

†*Helicotylenchus nannus**Meloidogyne incognita*†*Meloidogyne javanica*†*Rotylenchus erythrinae* (?)*Uredo nigropuncta*

JAPAN:

†*Ascochyta pisi**Coleosporium solidaginis**Criconeoides xenoplax**Cylindrosporium chrysanthemi**Diplodia taxi**Discosia artocreas**Gymnosporangium haraeaeum*†*Leptosphaeria culmifraga**Mcinospora zamiae**Meliola citricola**Meloidogyne arenaria*†*Meloidogyne arenaria thamesi**Meloidogyne hapla**Meloidogyne incognita**Meloidogyne javanica**Mycosphaerella schocnoprasi*†*Ophiobolus oryzae**Phoma citricarpa*†*Phyllachora graminis*†*Puccinia buxi**Puccinia chrysanthemi*†*Puccinia hemerocallidis**Puccinia horiana**Sclerotiopsis testudinea**Septoria chrysanthemi**Septoria citri**Septoria oryzae**Thielaviopsis basicola*†*Tilletia horrida**Tritirachium dependens**Uromyces lispideae-procumbentis**Xanthomonas citri*

KWAJALEIN:

†*Phyllosticta coccolobae*

LIBERIA:

†*Stemphylium botryosum*

MACAO:

Phoma citricarpa†*Septoria citri*

MARQUESAS ISLANDS:

†*Cercospora musae*

MARTINIQUE:

†*Meloidogyne incognita acrita*

MEXICO:

*Alternaria dianthi**Ceratocystis radicola**Cercospora mangiferae**Cercospora purpurea**Coleosporium dahliae**Colletotrichum agaves**Colletotrichum capsici*†*Colletotrichum coffeanum**Colletotrichum philodendri*†*Corynespora cassicola*†*Criconeoides mutabilis*†*Cronartium quercuum*†*Cryptosphaeria eunomia* (?)*Cytospora sacchari**Ditylenchus dipsaci*†*Echidnodes bromeliacearum**Elsinoe mangiferae**Fusarium oxysporum* f. *gladioli**Fusarium solani*
